

JMJ Medical Inc

Tomorrow's tech in today's care

What's the value?

JMJ Medical provides an automated product to increase revenue by identifying high-value billing opportunities and allow clinics to offer preventative care without added administrative workload

How does it work?

- Compatible with all EMR platforms
- Provide us with your EMR login and official email access
- Let us know which patient demographic to recall (ie complex care patients, 14050 CDM patients, patients with care gaps as per guidelines, etc)
- Review standardized email templates

Backend

- Our product will generate the list of requested patients to recall from the EMR
- An email template reviewed by the physician will be sent to all indicated patients through the clinic's official email
- They will be asked to call the clinic to book an appointment for the purpose indicated within the email
- The content of the email will be password protected to ensure privacy and security
